

Q2C Renewal Delayed Invoicing Enhancement-20260601_113501-Meeting Recording

June 1, 2026, 4:35PM

26m 0s

● **Jennifer Relles** started transcription

Michele Talbott 0:04

is that for customers that want to receive an invoice on or after a specific date for the term that they're being quoted for, it is the actual term of their renewal. The second flavor is that when we do multi-years in CPU for renewal.

Joann Raymond 0:12

The.

Angie Francisco 0:15

Yeah.

Michele Talbott 0:24

We don't have a way to set up the, you know, I'm only, it's a multi-year, but I'm only invoicing for the first year. Term dates are correct, but we only need to invoice for the first year of their renewal.

Angie Francisco 0:36

Mhm.

Okay. Yep.

Michele Talbott 0:41

And then...

Angie Francisco 0:42

and that English hold concept for multi-year can or cannot be used in these scenarios.

John Miller 0:42

Yeah.

Michele Talbott 0:44

Correct.

That is, I'll leave that to Joann to answer that one. I don't know the answer.

Angie Francisco 0:53

OKOK.

Michele Talbott 0:55

And then the third flavor that we refer to on the renewal side is...

Payment terms to what Brenda is saying, right? So that we have something different other than the net 30 or net 60 or net 90, which are the standard in CPQ.

Angie Francisco 1:03

In.

Joann Raymond 1:03

It.

Angie Francisco 1:06

It.

And do we think that there is there is truly a desire for a customer to extend the payment terms, or is it really just that invoice date that's essentially the real issue?

Michele Talbott 1:12

And.

Um...

John Miller 1:21

The.

Michele Talbott 1:24

There are some, yeah, there are some facilities customers, Angie, and I don't know who they are because I'm not used to the facilities renewals yet that do have different payment terms that are outside of the normal that we already have set up.

Brenda Cable 1:42

But isn't that mostly the Boises that you're talking about, Michelle, possible?

Angie Francisco 1:42

Okay.

Michele Talbott 1:45

It is mostly the buses are customers in New York or that are associated with some other thing or right that have already previously done. So in my mind those should be set up for those customers, but right now we don't for renewals, all of our orders out of CPQ for renewals are being booked immediately.

Brenda Cable 1:48

Yeah.

John Miller 1:54

Yeah.

Michele Talbott 2:07

So we kind of needed to, I guess, clarify what the ask was and make sure that anything that we're currently doing today

Finance is okay with what we do on the renewal side so that when we build it or we ask for what we need, it's okay.

Joann, did I summarize that?

Angie Francisco 2:30

I think we just want to be...

Joann Raymond 2:31

So, yeah, yeah, I think, you know, it definitely addresses the CPQ side, just for

transparency, right? On the Oracle side, so we still are doing orders through Apex slash Oracle. And in those cases,

John Miller 2:49

Yeah.

Joann Raymond 2:51

We do have the ability to put a hold on.
the invoice creation. So we will book the order.

Brenda Cable 3:00

Yes.

Jennifer Relles 3:01

Yeah.

Joann Raymond 3:03

but the invoice is not generated until that specified date.

Brenda Cable 3:10

And that's how we've been doing it. So that's not a new process.

Joann Raymond 3:13

Correct.

Jennifer Relles 3:14

I.

Joann Raymond 3:14

That is not a new process.

Brenda Cable 3:16

Right. And that's what we call delayed bill. That's what in my mind we talk about delayed billing is we're not stopping services or we're not doing anything to the services. We're just not invoicing until a date that they can fit their budget.

Jennifer Relles 3:21

Okay.

Joann Raymond 3:31

Generally, there's no issue with the services piece of it. It is generally that they don't expire until July 31st or August or whatever it is, and they can't get their invoice until that new budget period. And that aligns with their

Brenda Cable 3:36

Yeah.

Right.

John Miller 3:45

Yeah.

Brenda Cable 3:47

Period. Yep, yep.

Joann Raymond 3:51

Renewal, so.

Angie Francisco 3:53

Which again is just changing the invoice date on the invoice, right? That's all we're saying.

John Miller 3:57

What?

Joann Raymond 4:00

Correct.

Angie Francisco 4:02

Usually things are set up to have, you know, the invoice go out ahead of time, 30, 60,

whatever, 90 days. This is saying, nope, we need it to be on day one of their subscription-ish, right?

Brenda Cable 4:14

Right.

Michele Talbott 4:14

Or a date that specified, Angie, right? That, that you know.

Joann Raymond 4:15

Kemp.

Yeah.

Angie Francisco 4:21

And the different data than that would be interesting to understand before we tried to build.

Michele Talbott 4:21

Um...

Joann Raymond 4:28

So in that case, it's more of like their renewal doesn't start until September, but they can get the invoice in July because that's when their new budget starts.

Michele Talbott 4:42

It doesn't always align with the term dates, Angie, is what I'm saying. The it's a specified date that the customers give us, so...

Joann Raymond 4:42

So we.

Yeah.

Yeah.

Angie Francisco 4:49

Yeah, so let me try, I'll say it a little different then. If they are asking for a date later than the subscription start date on the invoice, then we'd want to talk about that.

 **Joann Raymond** 5:01
Yeah.

 **Angie Francisco** 5:04
Does that make sense?

 **Joann Raymond** 5:05
Yes, I mean.

 **Michele Talbott** 5:06
Yes, and we have those for facility, so, and the BOCES, so.

 **Joann Raymond** 5:09
Yeah, yeah, to me, that would be more payment terms thing then.

 **Michele Talbott** 5:15
Yep.

 **Brenda Cable** 5:16
You.

 **Angie Francisco** 5:16
Say that again.

 **Michele Talbott** 5:17
Time.

 **Joann Raymond** 5:18
To me, that would be more in payment terms.

 **Angie Francisco** 5:22
I hope that we're delaying revenue recognition.

Michele Talbott 5:22

Okay.

John Miller 5:26

Two.

Joann Raymond 5:27

Mhm.

Angie Francisco 5:27

Because the invoices.

Joann Raymond 5:30

Yeah.

Brenda Cable 5:32

Wait a second, wait a second. On the Boise's, so you're saying that, I'm just going to throw out an example. We're saying that the renewal starts on June 1st, but you're not going to invoice until?
September.

Michele Talbott 5:46

A later date. Yes, versus some other day. And I can't.

Brenda Cable 5:49

But isn't that just a delayed billing?

Michele Talbott 5:52

Hi, hi again. I don't know the language that you guys use. I'm just giving you the business scenario. I feel like you guys need to answer that question, but it has come up. So some will, most will align to their subscription start dates, align to when their new budget year starts. They just can't be invoiced.

Brenda Cable 5:58

Yeah.

John Miller 6:09

Yes.

Michele Talbott 6:12

outside of that budget year. We do have customers that, again, if it's payment terms, that's what needs to be used, then cool, we have that conversation around it. But I have seen facilities that have said the BOCES have longer payment terms then.

Angie Francisco 6:35

Payment terms I'm still okay with. It's when they want the invoice created or dated after the subscription start date.

Brenda Cable 6:36

But that's an...

Sorry.

Joann Raymond 6:42

Yes.

Angie Francisco 6:46

So their subscription starts July 1st, but the scenario that I'm trying to confirm or deny if it exists as a need is that they don't get invoiced until October 1st.

Jennifer Relles 6:46

Thanks.

Michele Talbott 6:58

I don't know how far it goes out, Angie, but yes, I have we have customers that get invoiced after and even for Destiny where their renewal term will be starts July 1st and they cannot be invoiced until July 1st or after.

Angie Francisco 6:59

Invoiced.

Carrie Bentley 7:09

If we go out and call.

Angie Francisco 7:15

Yeah, okay.

Michele Talbott 7:20

I'm sorry, I'm not trying to be difficult. I just don't know what the difference is or how far out we call something a delayed invoice or payment terms.

Angie Francisco 7:21

Yeah.

Brenda Cable 7:22

No, no, no.

Angie Francisco 7:33

The first real example, yeah, the first.

Michele Talbott 7:34

So is there a line in the sand?

Angie Francisco 7:39

The line in the sand for revenue recognition is if we don't have an invoice created in Oracle in the month that the subscription start occurs.

John Miller 7:50

K.

Angie Francisco 7:55

So if we could identify that scenario that we could actually get the real story behind, that would help. That would be super helpful.

Michele Talbott 8:05

Okay, well, and that was helpful. That explanation sunk in, Angie. Thank you.

John Miller 8:06

Yeah.

Joann Raymond 8:06

Nick.

Angie Francisco 8:10

Yep.

Brenda Cable 8:15

So, Angie, what you're seeing is the renewal must invoice.
at the start of the renewal period.

Angie Francisco 8:24

Yes, we need an invoice created in Oracle in the month that the subscription starts so that we have revenue.
regardless of payment terms, yada, yada, yada. If the invoice is before, no problem. If the invoice is a month or later, then we have revenue issues.
And it would seem weird that we would...
Do that on a renewal, but I'm sure there's...

John Miller 8:49

Yeah, I think that would be rare, Angie. I think, I think the probably 95 5 rule is customers don't want an invoice dated prior to July 1 and their and their term date starts July 1.

Angie Francisco 8:49

Zone.

Okay, good.

Joann Raymond 8:59

Help.
Brent.

Angie Francisco 9:03

Mhm, mhm.
Yep.

John Miller 9:09

So we line those up and run those invoices on July 1. That's probably the 95-5 rule.
There could be edge cases out there, but it's...

Angie Francisco 9:16

Yep.

John Miller 9:24

I don't think, I think it'll take you longer to find one than to just move on.

Angie Francisco 9:30

Got it.

Joann Raymond 9:31

Yeah.

Brenda Cable 9:34

So in that case, John, in my mind, that would just be a delayed billing, a delayed invoice, delayed billing, however you want to word it. It's not that we need a payment plan for it. It's just we need to delay the invoicing.

John Miller 9:37

Two.

Angie Francisco 9:45

Yeah.

John Miller 9:48

Correct.

Because our normal business process is to invoice the customer.

Joann Raymond 9:56

And.

John Miller 9:59

Up to 60 days prior to their renewal start.

Brenda Cable 10:01

Right.

Right.

John Miller 10:05

So this is for those customers who don't want an invoice dated prior to their new fiscal calendar, but they also don't want to move their renewal start date out 60 days to September 1st, for example.

Brenda Cable 10:25

Flight.

John Miller 10:27

And we keep saying, OK.

Brenda Cable 10:33

And I know facilities does that a lot. I know that, you know, Carrie, that happens a lot with him with a lot of his customers that on the facility side, they want the invoice date to be the start date of the renewal.

Joann Raymond 10:45

Tickle.

Carrie Bentley 10:50

Yeah, I mean, we have that across all products.

Brenda Cable 10:52

All products to be okay. I just, I guess I get more involved with both Port Nick on a lot of them than others.

Carrie Bentley 10:53

Yeah, no.

Brenda Cable 11:01

Oh.

Joann Raymond 11:01

Okay.

Michele Talbott 11:03

I think I thought.

Carrie Bentley 11:03

John and I have one more question, Michelle, I'm sorry. Angie and John, in the scenario where...

Michele Talbott 11:04

Go ahead.

Angie Francisco 11:07

Is it?

Carrie Bentley 11:10

We do have the situation that Angie is talking about, that that invoice, let me think of how I want to word this.

The invoice was created. Let's just say no, that's not what what am I trying to ask? I

guess in the scenarios where it's not going to be Angie within that same month, right?

Angie Francisco 11:30

Month.

Carrie Bentley 11:33

I think what we typically are finding, we do have that scenario, right? Like John said, I don't think it's as often as the July 1st scenario, which isn't an issue because that would be within the same month. But typically we handle those scenarios when that happens with the credit and rebill. And is that still okay? Meaning?

Angie Francisco 11:41

The.

And yes, I left.

Yeah.

Carrie Bentley 11:54

I'm trying to think of an example, Michelle, but...

If we've created the invoice and then we find out, well, they cannot pay that invoice because it needs to be dated by X or it needs to be dated at the time that they finally gave us the PO or I'm trying to think, we usually do a credit and rebill on those scenarios.

John Miller 11:59

The.

Angie Francisco 11:59

Yeah.

Yeah, I think.

Yeah, and it's likely probably okay. The key in all of that is did the subscription start date change? Because if that changes and gets pushed, that's what, that's the issue or that's the trigger of there being bad rev rec. If we are...

John Miller 12:15

Yeah.

Carrie Bentley 12:17

Okay.

Angie Francisco 12:33

allowing A renewal customer to basically skip a month, right? Like we're giving them a free month because we're pushing their subscription start date. Those are the ones that as they come up, let's just talk about them.

Carrie Bentley 12:38

Mhm.

Mhm.

Okay, I see what you're saying. Yeah, no, we're not usually giving them anything free.

Yes, okay, I understand.

Angie Francisco 12:50

Right, right.

Joann Raymond 12:52

Yeah.

Angie Francisco 12:53

And in that case, when you do those term and rebuilds, right, it just offsets each other because the subscription start date didn't change. You see an invoice and credit and an invoice. We see all that netted to no issue.

Carrie Bentley 12:57

Right.

Brenda Cable 13:01

I.

Joann Raymond 13:04

No.

Carrie Bentley 13:06

Okay.

Michele Talbott 13:07

Yeah, and I think the most common scenario too is that we have, you know, people will send their POs early just to be done with them. And, you know, we...

John Miller 13:08

Yeah.

Brenda Cable 13:16

Yep.

Michele Talbott 13:20

sit on them, we hold them, we don't want to hold them, but we'd rather just align them to their start date or something to when they're not going to make us back something out. Angie, we'd prefer not to back anything out.

Carrie Bentley 13:32

Yeah.

Angie Francisco 13:36

Sure, okay. And so what it, maybe can we talk through how we're addressing this? Like what is the change and what is the, what are we doing to try and do? Yeah.

Michele Talbott 13:46

Help.

From the CPQ side, we haven't seen anything yet.

Angie Francisco 13:53

Oh, okay.

Mm.

Michele Talbott 13:55

They haven't, it's in development, but we haven't seen.
what they're doing.

Carrie Bentley 14:01

But Angie, I mean, long story short, the goal, right, is for this enhancement to automate, let's just say on the renewal side, customer expires June 30th. We've quoted them. They think the quote is great. They've maybe even sent us a PO.

John Miller 14:04

Just.

Angie Francisco 14:10

Mhm.

Mhm.

Mhm.

Mm.

Carrie Bentley 14:20

And they have told us that the invoice date cannot, it's got to reflect 7-1 or later. So this enhancement would allow us to, Joanne, you may have to help me with the wording here, book the order, but hold the invoice to actually be created until that 7-1 date or later so that we're not sitting here manually with sticky notes saying, okay, now go push that one through.

Angie Francisco 14:24

Mhm.

Mhm.

Mhm.

Okay.

Carrie Bentley 14:42

because 7-1 has passed. Did I explain that okay, Joann and Michelle? Okay.

Angie Francisco 14:42

Okay.

Joann Raymond 14:45

Yep, yep, that's exactly.

Michele Talbott 14:47

Yes.

Carrie Bentley 14:48

Okay.

Angie Francisco 14:48

So it's really just enhancing CPQ where Joann, you're basically doing the same thing in Oracle no matter what.

Joann Raymond 14:58

That we'd be doing the same thing in CPQ.

Angie Francisco 14:58

or unfair.

John Miller 15:00

H.

Joann Raymond 15:05

that we do in Oracle.

Michele Talbott 15:09

Update hold.

Joann Raymond 15:11

Yeah.

Angie Francisco 15:11

But the all holds are in Oracle, as far as I am aware.

Michele Talbott 15:15

Yes, yes. So we would, the ask is to push that date if, so for Carrie's example, that I'm not triggering the invoice until the date that I have populated on the CPQ order.

Joann Raymond 15:17

Yes, yeah.

Angie Francisco 15:31

Like, essentially, you're telling Oracle not to renew it until the month that the subscription starts. The renewal invoice trigger timing is being updated in CPQ, which hopefully will push to Oracle so that you're not doing a manual invoice hold in Oracle.

Michele Talbott 15:35

Yes, yeah, yeah.

Joann Raymond 15:37

Yeah.

Yeah.

Michele Talbott 15:40

Yes.

Yes.

Joann Raymond 15:44

Yes.

Michele Talbott 15:45

Correct.

Joann Raymond 15:51

Correct, yeah.

Michele Talbott 15:51

Wait, I would like to not touch things manually. Yes.

Angie Francisco 15:55

No, I mean, I get it. Okay.

Michele Talbott 15:59

Yes.

Angie Francisco 15:59

That should be fun.

Carrie Bentley 16:01

Ha.

Michele Talbott 16:01

But.

There is one other thing that hasn't come up, but it came up in the conversation about this enhancement too, is that we have certain things that we don't want to invoice the customer. So things when we make changes or we're doing those credit and rebills and that things go into an entered status. So Joann has an opportunity or whoever.

Angie Francisco 16:20

Yeah.

Yep.

Michele Talbott 16:26

is touching the order physically in Oracle, has a time, a chance to go get it and do something with it, or even doing, you know, this invoice doesn't go to the customer.

Angie Francisco 16:34

Yeah, mhm.

So this I equate to what Christine called the SH special handling term. Okay, yep.

Michele Talbott 16:44

Yes, yes, exactly.

Angie Francisco 16:51

And so in those cases, I think that's where Brenda is going to want to be interested in on what is and is not being sent to the customer. If it's not just a strictly a.

Brenda Cable 16:58

Correct.

Angie Francisco 17:01

A temporary hold.

Brenda Cable 17:04

Yep.

Michele Talbott 17:06

How did Joann, how do you for those special handling or things that you're putting?

Joann Raymond 17:10

Play.

Michele Talbott 17:13

I don't know how to say this, where we put somebody's name in it so the invoice doesn't go to the customer. What is the current state now?
for those kinds of situations.

Joann Raymond 17:23

Well, we on the renewal side don't do that very often. It's really on the new sales that it happens more often because they're doing the summary invoice.

Brenda Cable 17:27

Yeah.

Michele Talbott 17:31

Mhm.

Joann Raymond 17:36

Um...

Angie Francisco 17:37

But you can do special handling without a summary invoice.

Joann Raymond 17:39

But we.

Brenda Cable 17:41

Yes.

Joann Raymond 17:41

Yes, yes.

Michele Talbott 17:43

Can we use an example, Joann? So like Fairfax, when Jen said, I don't want the three back years that we just canceled out to go those invoices to go to the customer immediately. What do you do?

Joann Raymond 17:49

The.

Uh...

So I would be doing the SH on the new ones.

Um...

Angie Francisco 18:04

The new voice.

Joann Raymond 18:05

Yeah, the new invoices. Yeah.

Angie Francisco 18:08

And you don't have to do anything on a credit memo currently, because those don't go anywhere if I understand everything correctly. Okay.

Joann Raymond 18:08

Yeah.

Brenda Cable 18:09

But...

Not today, they don't know.

Joann Raymond 18:17

Yeah, Ryan.

Angie Francisco 18:18

Okay, yep, that makes sense. So you are using the SH in that scenario, which is what I would expect, or which would seem logical to me.

Joann Raymond 18:23

Yeah.

Brenda Cable 18:26

And.

Joann Raymond 18:28

Yeah.

Michele Talbott 18:34

And then we haven't really talked. Sorry, Joann, I don't need to.

Joann Raymond 18:35

But.

Yeah, no, I was just going to say for most cases, we don't, because like when we're doing a credit and rebill, right, the customer wants to see the rebill. So it's, you know, just for those exceptions where we don't want the invoice to go out.

Michele Talbott 18:53

Yeah, or we're fixing something that we did.

Joann Raymond 18:56

Yes, yes, yes.

Michele Talbott 19:00

Okay.

Angie Francisco 19:01

Is there a different scenario that, like, if you, is there a scenario where you don't use the SH to stop an invoice from going to somewhere?

Joann Raymond 19:12

Is there a scenario where we don't use the SH?

Angie Francisco 19:16

Yeah, when you don't want an invoice to go somewhere.

Joann Raymond 19:16

Is that what you said?

The.

Brenda Cable 19:25

But.

 **Joann Raymond** 19:25
No.

 **Angie Francisco** 19:26
OK, good. That's what I'm going to expect.

 **Joann Raymond** 19:27
The SH is what we would use for invoice to not go somewhere.

 **Angie Francisco** 19:32
Perfect.

 **Joann Raymond** 19:32
Not, yeah.

 **Angie Francisco** 19:37
Okay.

 **Michele Talbott** 19:39
And then we didn't really get into multi-year, so I don't know, I really don't know what happens on the Oracle side, Joann, but when we have like a five-year deal and the customer has been given the renewal for all five years.
But the agreement is only to bill the...

 **Joann Raymond** 20:11
Mhm.

 **Michele Talbott** 20:11
be invoicing them for their upcoming renewal. So let's say it's a 7.1 start date. I would only be invoicing them for the first year.

 **Joann Raymond** 20:19
Yeah, so with those, what we have done is we've processed them as individual renewals for each consecutive year, and then we put the invoice interface hold on

the.

Out renewals so that they then the invoice generates then on the next term. For the next term.

Michele Talbott 20:36

Okay.

Joann Raymond 20:46

So if it's July 1st this year, then we would do July 1st each consecutive year.

Michele Talbott 20:54

And that would be more payment terms because in CPQ, it's only one quote. We don't want to split it up into five separate orders. We would still want it to be one order. We would consider that payment terms then.

Joann Raymond 21:07

If it's, if it is going to be that way, then I guess it would have to be payment terms.

Brenda Cable 21:14

So, we...

Joann Raymond 21:14

Which I don't know how that'll work.

Angie Francisco 21:14

So I think what I mean is we don't know.

Brenda Cable 21:17

Well, that would put, okay, so that would, and we've, I've done it a couple of times. I would just have to have the each renewal with a July 1st for the following years.

Joann Raymond 21:23

The.

Brenda Cable 21:27

So I would have to take the, you guys would have to tell me it's \$10,000 and they're doing \$2,000 per year and tell me what that date is. So it'd be July 1st of 27, 28, 29, da, da, da, da. I'd have to create those.

Joann Raymond 21:34

Yeah.

It'd be more based on dollar amount then.

Angie Francisco 21:40

Are we?

Michele Talbott 21:40

So it is a plan.

Brenda Cable 21:43

Huh?

What, Joann?

Joann Raymond 21:45

It would be it would be based more on dollar amount then.

Brenda Cable 21:48

It would, no, it would be based if you're having to do a five-year deal, if I'm understanding correctly. So if the renewal is for five years and you're sending out the first year, but you're putting on hold the other four years,

Joann Raymond 21:55

It's.

Angie Francisco 21:59

Yes.

Brenda Cable 22:02

If it's on one quote, I would think I would have to have a payment term showing those additional four years and the date we want the system to send the invoice out.

Angie Francisco 22:13

Can we suffer?

Joann Raymond 22:13

And you can specify the amount for each year, because each year would be different.

Michele Talbott 22:16

But.

Brenda Cable 22:17

Yes. Yes, I can specify, if you give me that information, I can specify the amount and I can put like July 1st, 27, July 1st, 28 based on those amounts. And John, that should allow the system to auto bill those based on that payment term, correct?

Michele Talbott 22:19

But.

John Miller 22:35

Correct.

Angie Francisco 22:37

So how does the invoice get generated for the second year? Somebody is putting an invoice hold on until that second year or no?

Joann Raymond 22:45

No, it's based on the payment terms.

Brenda Cable 22:45

It shouldn't be. It should just auto go. Yeah, because it's on payment terms. It should just that dollar amount. So if the quotes for, I'm just going to say \$10,000 or however it is, year 2 will bill whatever I put as a dollar value on year two. Same with year three, year four, year five for that entire quote.

Angie Francisco 23:00

But.

Joann Raymond 23:06

So the payment term triggers the invoice to generate on a specified date as well as to bill it for the dollar amount specified.

Brenda Cable 23:12

Correct.

That is my understanding, John.

John Miller 23:19

Yep.

Angie Francisco 23:19

That sounds okay. Well, I'd very much love to test that.

Brenda Cable 23:20

Yep.

Angie Francisco 23:25

If that is, if that is the solution we are saying that is occurring.

John Miller 23:30

Yeah, because without that custom payment term, the five-year deal is going to come to Oracle in a booked status, and Oracle could invoice it within milliseconds of booking. And if there's no custom payment term, if it's just set up as net 30, all five years is going to get on one invoice.

Brenda Cable 23:39

Mhm.

Yep.

Angie Francisco 23:51

Uh-huh.

Michele Talbott 23:57

Yes, and we set it up for approvals on the, you know, it's quote to order, right, John?
So yeah, that's the whole point. We don't.

Angie Francisco 24:02

The.

Michele Talbott 24:07

I would hate to then have to split something that the customer has gotten. We've created a multi-year order or a quote for do the draft order and then have to go split it out into five separate renewals because we can't do custom payment terms.

Angie Francisco 24:25

Su.

Brenda Cable 24:31

Mm.

John Miller 24:31

Yes.

Jennifer Relles 24:44

Okay.

Angie Francisco 24:45

Doing it all up all at once.

John Miller 24:49

Which?

Michele Talbott 24:49

The second, when we're really only stopping CPQ from booking whatever we have on the order instantaneously.

Angie Francisco 24:51

Okay.

Okay, gotcha. I didn't get very far in any of the delayed invoice concept testing as part of UAT, so I'm really interested in seeing how this...

Michele Talbott 25:06

And we didn't have it, Angie, like on renewals, they didn't even have that, they didn't, sorry, I didn't mean to say that that way. They didn't understand that we needed that. So it wasn't an heat.

Angie Francisco 25:10

Yeah, yeah.

John Miller 25:19

Yeah.

Angie Francisco 25:20

Yeah.

Okay.

So, then we'll test whenever we get the solution built. I'm assuming we're all we're saying this will all be in the same maps environment to start with.

Joann Raymond 25:33

Okay.

John Miller 25:33

Chan.

Michele Talbott 25:34

With a pretty bow, Angie, sure.

Angie Francisco 25:35

Are you sure? Yeah. Okay. I've got some lame to tell you.

Joann Raymond 25:39

No.

Michele Talbott 25:41

But.

Jennifer Relles 25:41

Yeah, we are at time. I'm going to share all of this with KA and see if they have any other specific follow-up questions for any of you and regroup soon. Thanks, everyone. Thanks. You too.

Michele Talbott 25:53

Thanks, Jennifer.

John Miller 25:54

Thank you. Bye.

Brenda Cable 25:54

Alright, alright guys, take care.

Michele Talbott 25:55

Bye.

Nickolas Aristodemo 25:57

Thanks, bye.
